Annex 1

Resolution MEPC.192(61) – 2010 Guidelines for monitoring the worldwide average sulphur content of fuel oils supplied for use on board ships

Paragraph 11 is replaced by the following1:

“11 The reference value of the world wide average sulphur content of residual and distillate fuels supplied for use on board ships should be \( A_{wx} \), where \( x=r, d, \) and \( A_{wx} = A_{cr} \) as calculated in January of the year following the first three years in which data were collected on the basis of these Guidelines. \( A_w \) should be expressed as a percentage.”

1 This corrigendum does not affect the results of sulphur monitoring already carried out for 2010 (MEPC 62/4), 2011 (MEPC 64/4), 2012 (MEPC 65/4/9) and 2013 (MEPC 67/4).
