INTERNATIONAL CONFERENCE
ON MARINE POLLUTION, 1973
Committee III

DRAFT TEXT OF THE INTERNATIONAL CONVENTION FOR THE
PREVENTION OF POLLUTION FROM SHIPS, 1973

Text of Annex III as agreed by the Committee

ANNEX III

[DRAFT] REGULATIONS FOR THE PREVENTION OF POLLUTION BY
HARMFUL SUBSTANCES CARRIED BY SEA IN PACKAGED FORMS, OR
IN FREIGHT CONTAINERS, PORTABLE TANKS OR
ROAD AND RAIL TANK WAGONS

Regulation 1

Application

(1) Unless expressly provided otherwise, the regulations of this Annex
apply to all ships carrying harmful substances in packaged forms, or in
freight containers, portable tanks or road and rail tank wagons.

(2) Such carriage of harmful substances is prohibited except in accordance
with the provisions of this Annex.

(3) To supplement the provisions of this Annex each Contracting State shall
issue, or cause to be issued, detailed requirements on packaging, marking and
labelling, documentation, stowage, quantity limitations, exceptions and
notification for preventing or minimizing pollution of the marine environment
by harmful substances.

(4) For the purpose of this Annex, empty receptacles, freight containers,
portable tanks, road and rail tank wagons which have been used previously
for the carriage of harmful substances shall themselves be treated as
harmful substances unless adequate precautions have been taken to ensure that they contain no residue that is hazardous to the marine environment.

Regulation 2

Packaging

Packagings, freight containers, portable tanks and road and rail tank wagons shall be adequate to minimize the hazard to the marine environment having regard to their specific contents.

Regulation 3

Marking and Labelling

Packages, whether shipped individually or in units or in freight containers, freight containers, portable tanks or road and rail tank wagons containing a harmful substance, shall be durably marked with the correct technical name (trade names shall not be used as the correct technical name), and further marked with a distinctive label or stencil of label, indicating that the contents are harmful. Such identification shall be supplemented where possible by any other means, for example by the use of the UN number.

Regulation 4

Documentation

1) In all documents relating to the carriage of harmful substances by sea where such substances are named, the correct technical name of the substances shall be used (trade names shall not be used).

2) The shipping documents supplied by the shipper shall include a certificate or declaration that the shipment offered for carriage is properly packed, marked and labelled and in proper condition for carriage to minimize the hazard to the marine environment.

3) Each ship carrying harmful substances shall have a special list or manifest setting forth the harmful substances on board and the location thereof. A detailed stowage plan which sets out the location of all harmful substances on board may be used in place of such special list or manifest.
Copies of such documents shall also be retained on shore by the owner of the ship or his representative until the harmful substances are unloaded."

(4) In a case where the ship carries a special list or manifest or a detailed stowage plan, required for the carriage of dangerous goods by the International Convention for the Safety of Life at Sea in force, the documents required for the purpose of this Annex may be combined with those for dangerous goods. Where documents are combined, a clear distinction shall be made between dangerous goods and other harmful substances.

Regulation 5

Stowage

Harmful substances shall be both properly stowed and secured so as to minimize the hazards to the marine environment without impairing the safety of ship and persons on board.

Regulation 6

Quantity Limitations

Certain harmful substances which are very hazardous to the marine environment may, for sound scientific and technical reasons, need to be prohibited for carriage or be limited as to the quantity which may be carried aboard any one ship. In limiting the quantity due consideration shall be given to size, construction and equipment of the ship as well as the packaging and the inherent nature of the substance.

Regulation 7

Exceptions

(1) Discharge by jettisoning of harmful substances carried in packaged forms, or in freight containers, or in portable tanks or in road and rail tank wagons shall be prohibited except where necessary for the purpose of securing the safety of the ship or saving life at sea.
(2) Subject to the provisions of this Convention appropriate measures based on the physical, chemical and biological properties of harmful substances, shall be taken to regulate the washing of leakages overboard provided that compliance with such measures would not impair the safety of the ship and persons on board.

Regulation 8

Notification

With respect to certain harmful substances as may be designated by a Contracting Government, the master or owner of the ship or his representative shall notify the appropriate port authority of the intent to load or unload such substances at least 24 hours prior to such action.
