Side Event

IMO’s work to address emissions from international shipping

Monday, 1 December 2014, 19:15 – 20:00
Room “Maranga”

Organizer: International Maritime Organization (IMO)

Work by IMO to address GHG emissions from international shipping as part of sustainable maritime transport will be highlighted and outcomes of the Third IMO GHG Study 2014, which provides shipping emissions estimates for the period 2007 to 2012 and projections up to 2050, will be presented.
