The application will restart and you are now ready to use your product.

The screenshot displays the IMO-Vega database interface. At the top left, the logo reads 'IMO - Vega THE DATABASE' with a 'VERSION 23' badge. A search bar with a 'Search' button and 'Advanced search Search tips' link is on the top right. A 'Feedback' and 'User manual' link are also present. A left-hand navigation menu lists categories like 'Documents in IMO-Vega', 'SOLAS', 'MARPOL', 'Load Lines', 'Tonnage (TMC) 1969', 'STCW Convention and Code', 'ILO Conventions & Recommendations', 'Other Conventions', 'Mandatory Codes', 'Other Codes', 'Resolutions', 'Other Instruments', 'Circulars', 'IMO requirements by enter into force date', 'Ratification Status', and 'Flag Administration Information'. The main content area features a white box titled 'IMO-Vega Latest updates - Issued May 2019'. The text inside this box states: 'The database contains updated and consolidated IMO documents including: - Assembly committee 30th session, MEPC committee 73rd session and MSC committee 100th session - and circulars up until and including April 2019'. It further notes that MARPOL Annex VI reg. 14 and the Supplement to the IAPP Certificate have been amended, and that calculation guidelines for EEDI and MARPOL Annex I for FPSOs and FSUs have been replaced. It also mentions that guidelines on goal-based standards for bulk carriers and oil tankers have been replaced, and that advanced search principles for ship types have been amended. Finally, it states that forthcoming requirements to mandatory conventions and codes are highlighted in green in the Ref. Table of Contents, and that IMO requirements by enter into force date are expected into force in the future. A link to 'See new documents in this version' is provided. At the bottom of the interface, the IMO and DNV-GL logos are displayed, along with the copyright notice: '© International Maritime Organization and DNV GL AS. All rights reserved.'
