**Procedures for port state control.** 2000 edition. (IMO-650E). Language(s) : E, S, F

Port State control has become more and more important in the work of IMO, starting in 1981 with Assembly resolution A.466(XII) on procedures for the control of ships and continuing with many more related texts. In 1995 a comprehensive document on the subject was adopted by resolution A.787(19), Procedures for port State control. This resolution provides basic guidance to Administrations on the conduct of inspections, in order to promote consistency in the conduct of inspections worldwide and harmonize the criteria for the application of control procedures. The General Procedural Guidelines for Port State Control Officers are of particular relevance. Amendments were adopted in 1999 by resolution A.882(21), and the 2000 edition contains the consolidated text of resolution A.787(19) as amended by resolution A.882(21). It also includes updated information on contact addresses of responsible national authorities.
